5. Handrail : wide and thick handrail makes user feel moderate and smooth; board space structure guarantees free and comfortable exercise; high-quality material adopted .
6. Frame: stable system; minimum noise system; stable and durable frame system.
7. Motor : Super noiseless AC motor.
8. Continuous Power: 3.0HP; Max power: 7.0HP
9. Speed Range: 1-20km/h Incline Range: 0-20%
10. Running Belt: Germany Siegling
11. Transducer : Mitsubishi (optional)
12. Perimeter: 3514mm Width 550mm Thickness: 3.1mm/4.0mm (optional) .
13. Running board: Aseismatic elastic running board, unique fourfold shock absorption technique, automatic lubrication system.
14. Roller: diameter 85mm length: 590mm
15. Racetrack Area: 1600(length)\*530(width) mm
16. Main Frame: steel welded Steel Thickness: 3mm-8mm
17. Voltage & Frequency: 220V+10% 50/60HZ
18. Dimension: 2280\*940\*1610mm (length\*width\*height)

19. Max User Weight :180KG

### Packaging & Delivery

Packaging Details:Plywood Case

Delivery Detail:Shipped within 7- 30 days after payment

### Show Room
